

# D & K Collision Repair Center

50 Woodland Ave, San Rafael, CA 94901

## Lamps Installed

**60W LED High/Low Bay**

Owner Francisco Velez has noticed an immediate difference in his auto repair shop: “In this type of business, lighting is really important. We do a lot of detail work, and with the new lights, we can see the little scratches on cars.”

Walking into the shop after the retrofit, it’s easy to see into every corner. “Now we can see what we’re doing,” Francisco explains. The shop is also saving money – and energy—thanks to the low-wattage LED lamps. D & K Collision won’t have to worry about new lighting for many years: “The lamps have a long warranty,” Francisco says, anticipating the day when they need to get new lights. “Hopefully I’m not here by that time!”

## Project Results

Reduced KW	<b>.69</b>
Reduced KWh/year	<b>1,626</b>
Reduced CO <sub>2</sub>	<b>881 lbs</b>

“It was dark before; now it’s light. We’re really happy.”
